Journal of Materials Processing Technology, 28 (1991) 437–439
Elsevier

Contents Volume 28

Vol. 28, Nos. 1&2, September 1991

Special Issue: Selection of Papers from the 7th International Conference on Computer-Aided Production Engineering, Cookeville, TN, USA, August 13–14, 1991

1. Machining

Mechanics of cutting model for simulated oblique rotary tool cutting processes
E.J.A. Armarego, A.J.R. Smith and V. Karri (Melbourne, Australia) 3

Effect of bevelling of carbide turning inserts on chip formation and cutting forces
C. Sikdar, S.S. Babu, A.B. Chattopadhyay (Khargpur, India) and V.C. Venkatesh (Cookeville, TN, USA) 15

Wear performance of ceramic cutting tool materials when cutting steel
S. Lo Casto, E. Lo Valvo (Palermo, Italy), E. Lucchini, S. Maschio (Trieste, Italy), F. Micari and V.F. Ruisi (Palermo, Italy) 25

On predicting chip breakability in machining of steels with carbide tool inserts having complex chip groove geometries
X.D. Fang (Wollongong, NSW, Australia) and I.S. Jawahir (Lexington, KY, USA) 37

The importance of allowing for the variation of thermal properties in the numerical computation of temperature distribution in machining
A.A.O. Tay (Singapore) 49

Optimal description of the time course of the cutting force components in multi-axis milling
K.-D. Bouzakis and G. Kalidaropoulos (Thessaloniki, Greece) 59

Condition monitoring of the drill process using a telemetry system
M. Pugazhendi and R. Krishnamurthy (Madras, India) 67

The effect of reverse shear on the failure of metal cutting tools
J.F.L. Chan and P.M. Braiden (Newcastle upon Tyne, UK) 75

A study on modification of endrills for finishing holes
S. Wang, V.C. Venkatesh and W. Xue (Cookeville, TN, USA) 83

Materials and manufacturing processes selection system for product designs in concurrent engineering
B. Gopalakrishnan and V. Pandiarajan (Morgantown, WV, USA) 93

2. Non-traditional Machining

Abrasive flow machining: a case study
L. Rhoades (Irwin, PA, USA) 107

A new sensing system to monitor abrasive waterjet nozzle wear
R. Kovacevic (Lexington, KY, USA) 117

Study of wire electrical discharge machined surface characteristics
R.E. Williams and K.P. Rajurkar (Lincoln, NE, USA) 127

Ultrasonic machining: a case study
R. Gilmore (Irwin, PA, USA) 139

Elsevier Science Publishers B.V.

Computer simulation of pulse electrochemical machining (PECM)
J. Kozak (Warsaw, Poland), K.P. Rajurkar and R.F. Ross (Lincoln, NE, USA) 149
Computer modelling of electrochemical machining with a rotating electrode
J. Kozak, L. Dabrowski (Warsaw, Poland), H. Osman (Egypt) and K.P. Rajurkar (Lincoln, NE, USA) 159
Intricate ruled surface machining by wire-EDM
Ni Zewang, Liu Zhengxun, Yu Chengye (Nanjing, China) and J.A. McGeough (Edinburgh, UK) 169

3. Grinding and Welding
Kinematics of nonconventional grinding
L. Dabrowski, M. Marciniak (Warsaw, Poland) and K.P. Rajurkar (Lincoln, NE, USA) 179
Optimum selection of grinding parameters using process modelling and knowledge-based system approach
P.S. Midha (Bristol, UK), C.B. Zhu (Beijing, China) and G.J. Trmal (Bristol, UK) 189

4. Forming
Customized application of computer-aided data acquisition and processing
H.W. Wagener and K.J. Pahl (Kassel, Germany) 201
A mathematical model of autoclave age forming
M. Sallah, J. Peddieson, Jr. (Cookeville, TN, USA) and S. Foroudastan (Nashville, TN, USA) 211
Knowledge-based design of progressive stamping dies
M.R. Duffey and Q. Sun (Amherst, MA, USA) 221

5. Neural Networks
Monitoring machining processes using multi-sensor readings fused by an artificial neural network
O. Masory (Boca Raton, FL, USA) 231
Application of neural networks for compliant tool polishing operations
V. Cariapa, K.S. Akbay and R. Rudraraju (Milwaukee, WI, USA) 241

6. Tool Management
Optimization of cutting conditions for multi-pass turning operations using sequential quadratic programming
M.S. Chua, H.T. Loh, Y.S. Wong and M. Rahman (Singapore) 253

7. Metrology and Vibration Free Machining
Surface quality assessment using computer vision methods
D.E.P. Hoy and F. Yu (Cookeville, TN, USA) 265
Computer-aided generation of optimum chatter-free pockets
S. Smith, E. Cheng and C. Zamudio (Gainesville, FL, USA) 275
Optimal passive vibration control of cutting process stability in milling
K.J. Liu and K.E. Rouch (Lexington, KY, USA) 285

Vol. 28, No. 3, December 1991

Physical modelling studies using spike-forging to verify analytical predictions
K.P. Rao (Hong Kong), S.M. Doraivelu (Dayton, OH, USA) and K. Sivaram (Hyderabad, India) 295

Research into the GFM forging process
S. Yang (Chongqing, China) 307
An experimental investigation into the stamping of elastic-plastic circular plates
L.C. Zhang (Cambridge, UK) and T.X. Yu (Beijing, China) 321
Grain-size and strain distributions within an automotive valve
A. Sánchez (Ramos Arispe, Mexico), R. Colás, I. Vélez (Mexico City, Mexico) and
R. Colás (Monterrey, Mexico) 335
Finite-element simulation of powder-metal forming
M.J.M. Barata Marques and P.A.F. Martins (Lisbon, Portugal) 345
Optimum die-surface design of gear-spline extrusions using a general surface model
R.-S. Lee, J.-J. Sheu and Y.-J. Gau (Tainan, Taiwan) 365
An effective technique for producing high-performance IN718 forgings using hammers
Z.J. Luo, H. Tang, F.C. Zeng, N.C. Guo (Xian, China), H.Y. Xu, H.B. Zhang and
L.F. Qi (Shaanxi, China) 383
A study of optimum die-design in the heading process with two blows. Part 1:
Experimental study
Y. Shin and K. Kawai (Yokohama, Japan) 391
Experimental and numerical prediction of the upsetting of a hot steel cylinder
D. Petty (Newcastle-upon-Tyne, UK), G. Watts, P. Ingham (Rotherham, UK),
P. Bettess and C. Grant (Newcastle-upon-Tyne, UK) 407
